

IPG Performance Indicators

Saskatchewan Structural Science Center (SSSC) Support (\$505,000)

Performance Objective

- The SSSC is a core research laboratory that supports scientific research across the institution

Performance Indicators

- Equipment is maintained at a high level which will allow the center to increase its users to reduce the level of institutional support

Target Outcomes

- Equipment continues to be maintained to support a high level of research

Aquatic Filtration Maintenance and Upgrade (\$400,000)

Performance Objective

- The University RDM Strategy provides a roadmap outlining how USask will support researchers at all levels in complying with funder and publisher data policies, conducting high-quality, responsible research, and applying best practices in RDM. This position will be essential in ensuring the strategy is implemented.

Performance Indicators

- The equipment in the SCC is maintained in good working order is kept up to date and is able to maintain our aquatic research fish.

OPUS (\$1,152,936)

Performance Objective

- Designed as a pre-accelerator, Opus provides aspiring entrepreneurs from USask with the tools needed to build successful ventures on campus.

Performance Indicators

- The expectation is to accelerate the growth of commercialization of the research of our faculty, staff, students and alumni

Target Outcomes

- The expectation is to accelerate the growth of commercialization of the research of our faculty, staff, students and alumni
