

# IPG Performance Indicators

## Saskatchewan Structural Science Center (SSSC) Support

### Performance Objective

- The SSSC is a core research laboratory that supports scientific research across the institution

### Performance Indicators

- Equipment is maintained at a high level which will allow the center to increase its users to reduce the level of institutional support

### Target Outcomes

- Equipment continues to be maintained to support a high level of research

### Targeted Outcomes reported

- The SSSC continues to support researchers across campus. The funding from RSF has ensured that the SSSC equipment is well maintained and available to support their research.

## OPUS Performance Objective

- Designed as a pre-accelerator, Opus provides aspiring entrepreneurs from USask with the tools needed to build successful ventures on campus.

### Performance Indicators

- The expectation is to accelerate the growth of commercialization of the research of our faculty, staff, students and alumni

### Target Outcomes

- The expectation is to accelerate the growth of commercialization of the research of our faculty, staff, students and alumni

### Targeted Outcomes reported

- Assessed 20 new invention disclosures from six colleges/schools
- Secured 31 license agreements, which are now part of 319 active licenses under management.
