

MentorSTEP

## MentorSTEP Internships Corporate Expression of Interest

### Overview

MentorSTEP is a partnership between the University of Saskatchewan and the Saskatoon Tribal Council (STC), funded by the International Minerals Innovation Institute (iMii). It aims to support young Indigenous women (First Nations, Métis, or Inuit) enrolled in STEM or related disciplines (science, technology, engineering and math, as well as business, health and environment) to pursue careers in Saskatchewan’s mining industry. [Visit MentorSTEP to find out more.](#)

### Internships

Summer research internship funds are available. Your company may support one or more qualified students (female undergraduate students who are First Nations, Métis, or Inuit) to pursue summer internship opportunities. Companies are expected to provide a robust, supervised internship opportunity using your company’s existing internship policies and procedures (i.e. conducting interviews, writing letters of offer, human resources guidelines, safety, payroll). MentorSTEP will work with you to identify potential USask students, or support existing or anticipated students who have applied to you for opportunities but may meet our guidelines and criteria. *A limited number of internships are available for summer 2021. Industry partners qualify for up to \$9000 in funding support.*

Students who are accepted for a MentorSTEP summer research internship may receive site visits, follow up and/or be interviewed for promotional purposes.

### Application

Please direct applications and any questions to Merle Massie, Coordinator Undergraduate Research Initiatives and MentorSTEP USask coordinator at [merle.massie@usask.ca](mailto:merle.massie@usask.ca) or call 306-966-7127.
